

Bombshell Report Finds 12,547 Illegal Votes In Georgia Election, Enough To Swing State

An audit conducted by election integrity organization, Look Ahead America (LAA), has found over 12,000 ballots that were cast illegally in the state of Georgia, which would exceed the margin of victory for Joe Biden.

NEW : Elections Integrity Org Identifies 12,547 Illegal Votes Included In Georgia's 2020 Election Results – Exceeds Margin of Victory In the State

— Patriot news (@Grahmptr) [April 21, 2021](#)

In the report, the LAA identified six tranches of potentially illegal votes and determined after their review of the first three that there were more than 12,000 illegal ballots counted in the 2020 election.

We have identified six tranches of illegal ballots.

Tranche 1: Early and Absentee Ballots Cast In the Names of Voters (EABCINV) registered illegally.

Tranche 2: EABCINV matched to permanent, out-of-state moves in the National Change of

Address Database (NCOA). At the time we processed this match in mid-November, the database contained records as recent as October 1, 2020 to as far back as three years prior (October 1, 2017).

Tranche 3: EABCINV matched to Out of State Subsequent Registrations (OOSSR) using our national voter database (NVD). In these cases, the voter had registered in Georgia and matched to voters subsequently registered in another state.

Tranche 4: Election Day Ballots Cast In the Names of Voters (EDBCINV) registered illegally.

Tranche 5: EDBCINV matched to the NCOA and OOSSR.

Tranche 6: Unmatchable Invalid Residencies Among EABCINV and EDBCINV

Due to the limitations of time, budget, and the inability to access necessary government databases, the VIP could only analyze the first three tranches.

The [full report](#) showed the following conclusion:

Summary and Conclusion

We established the following numbers of illegal ballots cast in each of the following tranches:

| | Initial Analysis | Percentage Valid | Projected | Margin of Error |
|-----------|------------------|------------------|-----------|-----------------|
| Tranche 1 | 1,056 | 100.0% | 1,056 | 0% |
| Tranche 2 | 15,700 | 67.8% | 10,651 | 6.2% |
| Tranche 3 | 4926 | 17.1% | 840 | 5.7% |
| Tranche 4 | ?? | | | |
| Tranche 5 | ?? | | | |
| Tranche 6 | ?? | | | |

The total projected number, not accounting for any illegal ballots in Tranches 4, 5, and 6, is 12,547. This exceeds the margin of victory in the 2020 General Election in Georgia, which was 11,779.

Thus, we conclude beyond a reasonable doubt that the deserved winner of the state of Georgia's presidential electoral votes in the 2020 General Election is unknowable.

As the LAA notes in its report, they identified more illegal votes than the margin of victory in the 2020 General Election in Georgia.

LAA's Voter Integrity Project Releases The Georgia Report

Today Look Ahead America released the long-awaited Georgia Report documenting the illegal ballots cast in that state's 2020 General Election.

The public version of the report can be [downloaded here](#). An unredacted version is being made available to government officials and select journalists and other individuals upon request.

Matt Braynard, Look Ahead America's executive director and founder of the Voter Integrity Project made the following statement:

We are very glad to release this report and I could not be prouder of my team at Look Ahead America that produced it. This effort is the result of hundreds of hours of work of over forty individuals and nearly \$100,000 in crowd-sourced funding.

Our conclusion remains: We prove beyond a reasonable doubt that the deserved winner of the state of Georgia's presidential electoral votes in the 2020 General Election is unknowable.

We look forward to releasing similar reports for Wisconsin and Arizona in the coming month.

I also look forward to this summer when our research group will turn its attention to identifying ineligible individuals in the voter databases of states that have elections this year: Louisiana, New Jersey, and Virginia.

I am grateful to our donors who made this possible and encourage our supporters to continue to contribute and volunteer to help us in our effort to complete this work.
