NPR had a story prepared three hours before the first person reportedly stormed the capital

building

At least one BLM activist has been arrested so far in connection with the Capital Building assault on January 6th, 2021. Antifa had posted on multiple platforms for their members to dress like Trump supporters and show up, mingle in, and cause havoc. A few Trump supporters went along for the ride with many more choosing not to, shouting things like "stop breaking those windows, who are you? Antifa?" Yet the violence continued unabated. The FBI has confirmed that they have 170 active criminal investigations into the persons who stormed the capital.

The media has been exposed now as having prior knowledge of the capital attack with multiple persons confirmed as having known the attack was coming before it did. Some sources saying the Capital police let the protesters in a side door without any resistance. According to Flashpoint Media multiple dark colored SUVs pulled up behind the capital building and as many as fifty people exited them and mingled in with Trump supporters, then proceeded to force their way into the building. Another witness testified to seeing Antifa exit four shuttle busses and those people were the ones that assaulted the building itself.

It is confirmed that at least one Trump supporter Ashli Babbitt was killed while being unarmed and climbing through a window, she was shot and killed by a member of the capital police. It has also been confirmed by the US DOJ that a Federal Use of Force Probe has been launched into that shooting.
