say brain blood through
our lord Jesus Christ we have
landed safely!

may the conflicts &
troubles of man never find
a home here!

spend time in question!

if you were going to the
Moon what would you say
or feel that you needed?

Primary Significance Man setting foot
on the Moon -

man demonstrating his ability to leave
the earth & return to it freely at will.
Escape the earth & live & work on the Moon.

- God created Man - Divine inspiration
to subdue the earth - Dominion over it!

How is it man can get to the Moon but
cannot solve so many problems right
here on earth?

man looks the will not the means.
" let's culture change his faith instead
of changing our culture through our faith.

What would happen if Neil Armstrong
& Edwin Aldrin planted a cross on
the Moon as a symbol of our religious
faith?

or leave a Bible there?

we are not advanced copies of the ape.
whether growing potatoes or straining to the
Moon - must be spirit of dedication.

How far will Man be able to go?
Will he go beyond the Moon?

Possibly go to Mars in your
life time ↓

God no doubt has set the limit.

Many of the Scientists & Technicians
in the space program are strong in their
faith in God.

Miracles of the Bible take
on new light - Believable.

Will they find higher life,
intelligence there? Not likely.
How would we trust them?
Hopefully better than we trust one
another.

Dr. Rodney W. Johnson, Scientist in
space program. Degree U. Minnesota,
Purdue W. foremost authority -
says - Support the Genesis account
of creation. To know that
Christ walked upon the earth.

"I would not be surprised, if
sometime in the future an
astronaut becomes a minister
or theologian."

Trip to Moon must be an extension
of the revelation of God

"What is man that Thou art
mindful of him?"

What would you like for them
to say or do when they
land on the Moon?
