JAP ATROCITIES ARE UNREVEALED

Former Consul Discloses Poisoning Attempt By Nipponese

New York, April 17.—(BUP)—Ramon Muniz La Valle, former Argentine consul in Hong Kong, said to-day that "only about five per cent" of the Japanese atrocities in Hong Kong and other conquered Far Eastern areas have been revealed.

The 33-year-old diplomat, his wife and their son, Jackie, 3, arrived recently in this country after a three months' trip across Manchuria, Siberia, the Caucasus, Turkestan, Africa and South America. He resigned from his position at Natal and came to New York.

La Valle said that despite his status as a neutral diplomat, the Japanese attempted to poison him last year in Tokio by putting drugs in a cup of tea and also caused the death of his five-year-old daughter, Wendy. The Japanese refused her hospital accommodations, he said, when she became ill of dysentery during an epidemic in which hundreds of others died.
